FULL PAPERS

PAGE

Biosynthesis and Degradation

Structure and metabolism of rat liver heparan sulphate.
By Å. Oldberg, M. Höök, B. Öbrink, H. Pertoft & K. Rubin 75

Incorporation of [^{14}C]shikimate into phenazines and their further metabolism by *Pseudomonas phenazinium*.
By G. S. Byng & J. M. Turner 139

Control of zinc-thionein synthesis in rat liver.
By K. S. Squibb, R. J. Cousins & S. L. Feldman 223

Bioenergetics

Steady-state metabolism and transport of D-glucose by rat small intestine *in vitro*.
By P. J. Pritchard & J. W. Porteous 1

A mutation affecting a second component of the F_0 portion of the magnesium ion-stimulated adenosine triphosphatase of *Escherichia coli* K12. The *uncC424* allele.
By F. Gibson, G. B. Cox, J. A. Downie & J. Radik 193

Sites and specificity of the reaction of bipyridylium compounds with anaerobic respiratory enzymes of *Escherichia coli*. Effects of permeability barriers imposed by the cytoplasmic membrane.
By R. W. Jones & P. B. Garland 199

Subcellular Structures

Isolation and characterization of membrane proteins responsible for attachment of polyribosomes to rough microsomal fraction of rat liver.
By S. Fujita, F. Ogata, J. Nakamura, S. Omata & H. Sugano 53

Reconstitution of glucose-transporting vesicles from erythrocyte membranes disaggregated in detergent.
By P. A. W. Edwards 125

Cellular Interactions and Control Processes

Changes in the kinetic behaviour of threonine transport into *Trypanosoma brucei* elicited by variation in hydrogen ion concentration.
By H. P. Voorheis 15

PAGE

Effects of starvation and development on mitochondrial acetoacetyl-coenzyme A thiolase of rat liver.
By W. D. Reed, P. T. Ozand, J. T. Tildon & M. Cornblath 27

Guanylate cyclase activity and cyclic nucleotide concentrations during liver regeneration after experimental injury.
By C. Goridis, J. Zwiller & W. Reutter 33

Some factors effecting the production, by cultured baby-hamster kidney cells, of BHK glycoprotein I, which cross-reacts immunologically with Tamm–Horsfall glycoprotein.
By F. J. Bloomfield, D. R. Dunstan, C. L. Foster, F. Serafini-Cessi & R. D. Marshall 41

Catecholamine-sensitive adenylate cyclase of caudate nucleus and cerebral cortex. Effects of guanine nucleotides.
By P. V. Sulakhe, N. L.-K. Leung, A. T. Arbus, S. J. Sulakhe, S.-H. Jan & N. Narayanan 67

Feedback regulation of vitamin D metabolism by 1,25-dihydroxycholecalciferol.
By K. W. Colston, I. M. A. Evans, T. C. Spelsberg & I. MacIntyre 83

Studies on the mode of oestrogenic inhibition of hepatic synthesis of α_{2u}-globulin and its corresponding messenger ribonucleic acid in rat liver.
By A. K. Roy, D. J. Dowbenko & M. J. Schiop 91

Adenosine as a constituent of the brain and of isolated cerebral tissues, and its relationship to the generation of adenosine 3′:5′-cyclic monophosphate.
By M. Newman & H. McIlwain 131

Control of isocitrate lyase synthesis in *Chlorella fusca* var. *vacuolata*. The basal activity of the enzyme and the kinetics of induction.
By C. F. Thurston 147

Comparison of glucose metabolism in the lactating mammary gland of the rat *in vivo* and *in vitro*. Effects of starvation, prolactin or insulin deficiency.
By A. M. Robinson & D. H. Williamson 153

PAGE

Effects of adenine nucleotides and phosphate on adenosine triphosphate sulphurylase from *Anabaena cylindrica*.
By S. K. Sawhney & D. J. D. Nicholas 161

Effect of prolonged ethanol ingestion on hepatic lipogenesis and related enzyme activities.
By M. J. Savolainen, J. K. Hiltunen & I. E. Hassinen 169

The mechanism of inhibition by acidosis of gluconeogenesis from lactate in rat liver.
By R. A. Iles, R. D. Cohen, A. H. Rist & P. G. Baron 185

Endogenous phosphorylation of microsomal proteins in bovine corpus luteum. Tenfold activation by adenosine 3′:5′-cyclic monophosphate.
By D. G. Hardie & D. A. Stansfield 213

The effect of insulin on the washout of [^{45}Ca]-calcium from adipocytes and soleus muscle of the rat.
By T. Clausen & B. R. Martin 251

The UDP-*N*-acetylglucosamine–asparagine-sequon *N*-acetyl-β-D-glucosaminyltransferase activity in preparations of rough endoplasmic reticulum from regenerating rat liver.
By Z. Khalkhali, F. Serafini-Cessi & R. D. Marshall 257

PAGE

Development

Studies on sex-organ development. Changes in nuclear and chromatin composition and genomic activity during spermatogenesis in the maturing rooster testis.
By C. Mezquita & C. S. Teng 99

Regulation of maize catalase by changing rates of synthesis and degradation.
By J. C. Sorenson, P. S. Ganapathy & J. G. Scandalios 113

Aldehyde dehydrogenase in 2-acetamidofluorene-induced rat hepatomas. Ontogeny and evidence that the new isoenzymes are not due to normal gene de-repression.
By R. Lindahl 119

Heterogeneity of proteoglycans in developing chick limb cartilage.
By N. S. Vasan & J. W. Lash 179

Metabolism in Whole Organisms

Comparison of the biliary excretion of the four isomers of bilirubin-IX in Wistar and homozygous Gunn rats.
By N. Blanckaert, K. P. M. Heirwegh & Z. Zaman 229

Characterization of the major diazo-positive pigments in bile of homozygous Gunn rats.
By N. Blanckaert, J. Fevery, K. P. M. Heirwegh & F. Compernolle 237

RAPID PAPERS

PAGE

Biosynthesis and Degradation

Synthesis of cartilage-specific proteoglycan by suspension cultures of adult chondrocytes.
By O. W. Wiebkin & H. Muir 269

Effects of dolichol monophosphate on galactose incorporation into glycoconjugates of cell cultures.
By F. A. McEvoy, D. E. Ellis & S. Shall 273

Phosphatidylinositol-degrading enzymes in liver lysosomes.
By R. F. Irvine, N. Hemington & R. M. C. Dawson 277

Bioenergetics

Proton translocation coupled to electron flow from endogenous substrates to fumarate in anaerobically grown *Escherichia coli* K12.
By S. J. Gutowski & H. Rosenberg 265

PAGE

Subcellular Structures

Cellular transport of lysosomal enzymes. An alternative hypothesis.
By J. B. Lloyd 281

Cellular Interactions and Control Processes

Permeability of the liver cell membrane to quinolinate.
By K. R. F. Elliott, C. I. Pogson & S. A. Smith 283

Cellular Interactions and Control Processes (Special Communication)

Net activity of phospholipase A2 in brain and the lack of stimulation of the phospholipase A2-acylation system.
By C. E. Rowe 287

GENERAL BOOKBINDING CO.
77 369AA 2 013 1 C 2037
QUALITY CONTROL MARK

Contents of Volume 164, No. 2

FULL PAPERS

PAGE

Biosynthesis and Degradation

Role of haem in the synthesis and assembly of cytochrome *P*-450.
By K. S. Bhat, M. K. Sardana & G. Padmanaban 295

Turnover of myelin proteins in mouse brain *in vivo*.
By A. Lajtha, J. Toth, K. Fujimoto & H. C. Agrawal 323

Inhibition of protein degradation in isolated rat hepatocytes.
By M. F. Hopgood, M. G. Clark & F. J. Ballard 399

Bioenergetics

The nature of controlled respiration and its relationship to protonmotive force and proton conductance in blowfly flight-muscle mitochondria.
By R. N. Johnson & R. G. Hansford 305

Subcellular Structures

The transport and metabolism of glutamine by kidney-cortex mitochondria from normal and acidotic rats.
By J. T. Brosnan & B. Hall 331

Preparation of plasma-membrane subfractions from isolated rat hepatocytes.
By M. H. Wisher & W. H. Evans 415

Cellular Interactions and Control Processes

Iron-transport characteristics of vesicles of brush-border and basolateral plasma membrane from the rat enterocyte.
By E. J. Eastham, J. I. Bell & A. P. Douglas 289

The activities of 2-oxoglutarate dehydrogenase and pyruvate dehydrogenase in hearts and mammary glands from ruminants and non-ruminants.
By G. Read, B. Crabtree & G. H. Smith 349

PAGE

The effects of starvation and experimental diabetes on phosphoenolpyruvate carboxykinase in the guinea pig.
By K. R. F. Elliott & C. I. Pogson 357

Effect of a nutritional shift on the degradation of abnormal proteins in the mouse liver. Decreased degradation during rapid liver growth.
By R. Amils, R. D. Conde & O. A. Scornik 363

Regional differences in ribonuclease content of rat and mouse kidney.
By D. K. Liu & P. E. Matrisian 371

Uridine kinase activities and pyrimidine nucleoside phosphorylation in fluoropyrimidine-sensitive and -resistant cell lines of the Novikoff hepatoma.
By N. Greenberg, D. E. Schumm & T. E. Webb 379

A comparison of the effects of phytohaemagglutinin and of calcium ionophore A23187 on the metabolism of glycerolipids in small lymphocytes.
By D. Allan & R. H. Michell 389

Adenosine and the regulation of insulin secretion by isolated rat islets of Langerhans.
By N. A. Ismail, E.-E. S. M. El Denshary & W. Montague 409

The effects of acetate, metal cations, phenobarbitone, porphyrogens and substrates of glycine acyltransferase on the utilization of haem by rat liver apo-(tryptophan pyrrolase).
By A. A.-B. Badawy 431

Rapid partial purification of placental glucocerebroside β-glucosidase and its entrapment in liposomes.
By I. P. Braidman & G. Gregoriadis 439

The stimulus–secretion coupling of glucose-induced insulin release. Insulin release due to glycogenolysis in glucose-deprived islets.
By W. J. Malaisse, A. Sener, M. Koser, M. Ravazzola & F. Malaisse-Lagae 447

PAGE

Development

Development of mitochondrial energy metabolism in rat brain.
By J. M. Land, R. F. G. Booth, R. Berger & J. B. Clark 339

PAGE

Metabolism in Whole Organisms

Metabolic fates of diethylstilboestrol sulphates in the rat.
By P. A. Barford, A. H. Olavesen, C. G. Curtis & G. M. Powell 423

RAPID PAPERS

PAGE

Subcellular Structures

Some observations on the choice of detergent for solubilization of the human erythrocyte membrane.
By D. A. W. Grant & S. Hjertén 465

Self-digestion of human erythrocyte membranes. Role of adenosine triphosphate and glutathione.
By A. Brovelli, M. Suhail, G. Pallavicini, F. Sinigaglia & C. Balduini 469

Cellular Interactions and Control Processes

Stimulation of calcium accumulation in cardiac sarcolemma by phosphorylase kinase.
By P. V. Sulakhe & P. J. St. Louis 457

PAGE

The effects of antioxidants on the metabolism and mutagenicity of benzo[*a*]pyrene *in vitro*.
By A. D. Rahimtula, P. K. Zachariah & P. J. O'Brien 473

Inhibition of binding of corticotropin-(1–24)-tetracosapeptide (Synacthen) to membrane receptors of adrenal cortex by cortisol.
By A. L. Latner, D. B. Cook & K. U. Solanki 477

Metabolism in Whole Organisms

Enhanced plasma persistence of therapeutic enzymes by coupling to soluble dextran.
By R. F. Sherwood, J. K. Baird, T. Atkinson, C. N. Wiblin, D. A. Rutter & D. C. Ellwood 461

Contents of Volume 164, No. 3

FULL PAPERS

PAGE

Biosynthesis and Degradation

Studies on the mechanism of hepatic microsomal *N*-oxide formation. The role of cytochrome *P*-450 and mixed-function amine oxidase in the *N*-oxidation of *NN*-dimethylaniline.
By P. Hlavica & M. Kehl 487

The biosynthesis of tyramine glucuronide by liver microsomal fractions.
By K. P. Wong 529

Purification of membrane-bound galactosyltransferase from rat liver microsomal fractions.
By I. H. Fraser & S. Mookerjea 541

Bacterial catabolism of threonine. Threonine degradation initiated by L-threonine hydrolyase (deaminating) in a species of *Corynebacterium*.
By S. C. Bell & J. M. Turner 579

Biosynthesis of the pyrimidinyl amino acid lathyrine by *Lathyrus tingitanus* L.
By E. G. Brown & N. F. Al-Baldawi 589

PAGE

A spectrophotometric procedure for rapid and sensitive measurements of β-oxidation. Demonstration of factors that can be rate-limiting for β-oxidation.
By H. Osmundsen & J. Bremer 621

Chitin biosynthesis in protoplasts and subcellular fractions of *Aspergillus fumigatus*.
By D. B. Archer 653

Number and activity of active ribosomes in bacterial polyribosomes.
By J. Stenesh & P. Y. Shen 669

Comparison in different species of biliary bilirubin-IXα conjugates with the activities of hepatic and renal bilirubin-IXα-uridine diphosphate glycosyltransferases.
By J. Fevery, M. Van de Vijver, R. Michiels & K. P. M. Heirwegh 737

Bioenergetics

The probable site of action of thenoyltrifluoroacetone on the respiratory chain.
By W. J. Ingledew & T. Ohnishi 617

PAGE

Studies of energy-linked reactions. Inhibition of oxidative phosphorylation by DL-8-methyldihydrolipoate.
By D. E. Griffiths, K. Cain & R. L. Hyams 699

Comparative studies on glutamate metabolism in synaptic and non-synaptic rat brain mitochondria.
By S. C. Dennis, J. C. K. Lai & J. B. Clark 727

Subcellular Structures

Changes in surface-membrane components during the differentiation of rabbit erythroid cells.
By N. D. Light & M. J. A. Tanner 565

Selective permeability of rat liver mitochondria to purified aspartate aminotransferases *in vitro*.
By E. Marra, S. Doonan, C. Saccone & E. Quagliariello 685

Cellular Interactions and Control Processes

Characterization of a photoproduct of 7,12-dimethylbenz[*a*]anthracene and its effects on chick-embryo cells in culture.
By D. Warshawsky, E. Kerns, M. J. Bissell & M. Calvin 481

A new method for assaying rat liver microsomal 3-hydroxyl-3-methylglutaryl-coenzyme A reductase activity and its application in a study of the effect of dietary cholesterol on this enzyme.
By Y. A. Baqir & R. Booth 501

Diabetes and the control of pyruvate dehydrogenase in rat heart mitochondria by concentration ratios of adenosine triphosphate/adenosine diphosphate, of reduced/oxidized nicotinamide–adenine dinucleotide and of acetyl-coenzyme A/coenzyme A.
By A. L. Kerbey, P. M. Radcliffe & P. J. Randle 509

Effects of lactation on ketogenesis from oleate or butyrate in rat hepatocytes.
By E. Whitelaw & D. H. Williamson 521

Effect of cortisol acetate on collagen biosynthesis and on the activities of prolyl hydroxylase, lysyl hydroxylase, collagen galactosyltransferase and collagen glucosyltransferase in chick-embryo tendon cells.
By A. Oikarinen 533

Effects of di-isopropyl phosphorofluoridate on rat liver microsomal and lysosomal β-glucuronidase.
By B. Mandell & P. Stahl 549

PAGE

Hypoketonaemic effect of L-alanine. Specific decrease in blood concentrations of 3-hydroxybutyrate in the rat.
By P. T. Ozand, W. D. Reed, J. Girard, R. L. Hawkins, R. M. Collins, Jr., J. T. Tildon & M. Cornblath 557

The effect of chemical treatments of albumin and orosomucoid on rate of clearance from the rat bloodstream and rate of pinocytic capture of rat yolk sac cultured *in vitro*.
By A. T. Moore, K. E. Williams & J. B. Lloyd 607

Effects of 5-bromo-2′-deoxyuridine on beating heart cell cultures from neonatal hamsters.
By G. A. Coetzee, D. R. van der Westhuyzen & W. Gevers 635

5-Bromo-2′-deoxyuridine-stimulated calcium ion- or magnesium ion-dependent ecto-(adenosine triphosphatase) activity of cultured hamster cardiac cells.
By G. A. Coetzee & W. Gevers 645

Interactions of the anti-oestrogen, nafoxidine hydrochloride, with the soluble nuclear oestradiol-binding protein in chick liver.
By C. B. Lazier & W. S. Alford 659

Purification of rat liver particulate neutral ribonuclease and comparison of properties with pancreas and serum ribonucleases.
By J. Bartholeyns & P. Baudhuin 675

Adaptation of protein metabolism to endurance training. Increased amino acid oxidation in response to training.
By G. L. Dohm, A. L. Hecker, W. E. Brown, G. J. Klain, F. R. Puente, E. W. Askew & G. R. Beecher 705

Development

Pyruvate dehydrogenase activity in hamster small intestine during development.
By C. M. Schiller 693

Metabolism in Whole Organisms

The absorption and metabolism in rats of small oral doses of dimethylnitrosamine. Implication for the possible hazard of dimethylnitrosamine in human food.
By M. I. D. Gomez, P. F. Swann & P. N. Magee 497

The metabolism of cyclohexanecarboxylate in the rat.
By D. Brewster, R. S. Jones & D. V. Parke 595

Retained folates in the rat.
By P. A. Barford, F. J. Staff & J. A. Blair 601

PAGE

Microbiological degradation of bile acids. The preparation of hexahydroindane derivatives as substrates for studying cholic acid degradation.
By S. Hayakawa, T. Takata, T. Fujiwara & S. Hashimoto 709

PAGE

Microbiological degradation of bile acids. Metabolites formed from 3-(3aα-hexahydro-7aβ-methyl-1,5-dioxoindan-4α-yl)propionic acid by *Streptomyces rubescens*.
By S. Hashimoto & S. Hayakawa 715

RAPID PAPERS

PAGE

Cellular Interactions and Control Processes

Effects of acetoacetate administration on glucose metabolism in mammary gland of fed lactating rats.
By A. M. Robinson & D. H. Williamson 749

PAGE

Identification and partial characterization of phospholipases in isolated adrenocortical cells. The effects of Synacthen [corticotropin-(1–24)-tetracosapeptide] and calcium ions.
By S. G. Laychock, R. C. Franson, W. B. Weglicki & R. P. Rubin 753
